

## Environmental Policy

At Karadağlı Mining, we are committed to conducting our activities responsibly, minimizing our environmental impact, and protecting natural resources for future generations. Environmental responsibility is an integral part of our operations and decision-making processes.

### Our Commitments

We comply with relevant laws and regulations, as well as applicable national and international environmental standards.

We monitor and manage our environmental impacts and continuously implement measures to minimize and improve them.

We prioritize the efficient use of natural resources and plan activities to reduce energy and water consumption.

We increase the use of renewable energy sources and promote energy-efficient practices across our operations.

We protect biodiversity and natural habitats by considering environmental impacts throughout the planning and operation of our activities.

We provide training and development opportunities to increase environmental awareness among our employees and maintain a strong culture of environmental responsibility.

We use technologies and processes that minimize waste generation and promote the reduction, reuse, and recycling of waste at its source.

We manage hazardous and non-hazardous waste responsibly in accordance with applicable regulations and environmental standards.

We take appropriate measures to prevent soil, water, and air pollution and continuously monitor potential environmental risks.

We restore completed operational areas and support land rehabilitation to return affected areas to nature as far as practicable.

We encourage our employees, suppliers, and business partners to adopt responsible environmental practices and contribute to our sustainability goals.

We are committed to continuously improving our environmental performance and creating long-term value through responsible and sustainable mining practices.
